

GALANE GOLD LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

Dated: May 26, 2017.

MANAGEMENT'S DISCUSSION AND ANALYSIS

This management's discussion and analysis ("MD&A") of financial condition and results of operations of Galane Gold Ltd. ("Galane" or the "Company") was prepared by management as at May 26, 2017. Throughout this MD&A, unless otherwise specified, "Galane", "the Company", "we", "us" or "our" refer to Galane Gold Ltd. and its subsidiaries and should be read in conjunction with the unaudited condensed interim consolidated financial statements and notes thereto for the three months ended March 31, 2017 (the "interim financial report"), as well as with the audited consolidated financial statements and notes thereto for the year ended December 31, 2016 (the "Financial Statements").

The Financial Statements have been prepared by management and have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). The interim financial report has been prepared by management in accordance with IFRS applicable to interim financial reporting, including IAS 34, Interim Financial Reporting. All amounts are expressed in U.S. dollars unless otherwise noted. Other information contained in this document has also been prepared by management and is consistent with the data contained in the Financial Statements.

The Company's certifying officers are responsible for ensuring that interim financial report and MD&A do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made. The Company's certifying officers certify that the interim financial report together with the other financial information included in the interim financial report fairly present in all material respects the financial condition, financial performance and cash flows of the Company as the date of and for the periods presented in the interim financial report.

The Audit Committee and the Board of Directors provide an oversight role with respect to all public financial disclosures by the Company. The Board of Directors approves the Financial Statements and MD&A after the completion of its review and recommendation for approval by the Audit Committee, which meets periodically to review all financial reports, prior to filing.

FORWARD LOOKING STATEMENTS

Certain statements contained in this MD&A constitute "forward-looking statements". All statements other than statements of historical fact contained in this MD&A, including, without limitation, those regarding the Company's future financial position and results of operations, strategy, proposed acquisitions, plans, objectives, goals and targets, and any statements preceded by, followed by or that include the words "believe", "expect", "aim", "intend", "plan", "continue", "will", "may", "would", "anticipate", "estimate", "forecast", "predict", "project", "seek", "should" or similar expressions or the negative thereof, are forward-looking statements. These statements are not historical facts but instead represent only the Company's expectations, estimates and projections regarding future events. These statements are not guarantees of future performance and involve assumptions, risks and uncertainties that are difficult to predict. Therefore, actual results may differ materially from what is expressed, implied or forecasted in such forward-looking statements.

Additional factors that could cause actual results, performance or achievements to differ materially include, but are not limited to: the Company's dependence on two mineral projects; gold price volatility; risks associated with the conduct of the Company's mining activities in Botswana and South Africa; regulatory, consent or permitting delays; risks relating to the Company's exploration, development and mining activities being situated in Botswana and South Africa; risks relating to reliance on the Company's management team and outside contractors; risks regarding mineral resources and reserves; the Company's inability to obtain insurance to cover all risks, on a commercially reasonable basis or at all; currency fluctuations; risks regarding the failure to generate sufficient cash flow from operations; risks relating to project financing and equity issuances; risks arising from the Company's fair value estimates with respect to the carrying amount of mineral interests; mining tax regimes; risks arising from holding

GALANE GOLD LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

derivative instruments; the Company's need to replace reserves depleted by production; risks and unknowns inherent in all mining projects, including the inaccuracy of reserves and resources, metallurgical recoveries and capital and operating costs of such projects; contests over title to properties, particularly title to undeveloped properties; laws and regulations governing the environment, health and safety; operating or technical difficulties in connection with mining or development activities; lack of infrastructure; employee relations, labour unrest or unavailability; health risks in Africa; the Company's interactions with surrounding communities and artisanal miners; the Company's ability to successfully integrate acquired assets; risks related to restarting production: the speculative nature of exploration and development, including the risks of diminishing quantities or grades of reserves; development of the Company's exploration properties into commercially viable mines; stock market volatility; conflicts of interest among certain directors and officers; lack of liquidity for shareholders of the Company; risks related to the market perception of junior gold companies; and litigation risk. See "Risks and Uncertainties" below. Management provides forward-looking statements because it believes they provide useful information to readers when considering their investment objectives and cautions readers that the information may not be appropriate for other purposes. Consequently, all of the forward-looking statements made in this MD&A are qualified by these cautionary statements and other cautionary statements or factors contained herein, and there can be no assurance that the actual results or developments will be realized or, even if substantially realized, that they will have the expected consequences to, or effects on, the Company. These forward-looking statements are made as of the date of this MD&A and the Company assumes no obligation to update or revise them to reflect subsequent information, events or circumstances or otherwise, except as required by law.

The forward-looking statements in this MD&A are based on numerous assumptions regarding the Company's present and future business strategies and the environment in which the Company will operate in the future, including assumptions regarding gold prices, business and operating strategies, and the Company's ability to operate on a profitable basis.

CORPORATE OVERVIEW

The Company's principal business activities are the exploration for, development of, and operation of gold mining properties. The Company operates through its wholly-owned subsidiary, Galane Gold Mines Ltd. ("GGM"), which in turn operates two mines: (a) a producing mine which also has the rights to certain mineral exploration tenements (the producing mine and mineral exploration tenements collectively, the "Mupane Property") located in the Republic of Botswana ("Botswana") through subsidiaries located in Botswana; and (b) a mine which is being refurbished and which has the rights to certain mineral exploration tenements (the mine and mineral exploration tenements collectively, the "Galaxy Property") located in the Republic of South Africa ("South Africa") through subsidiaries located in South Africa. The common shares in the capital of the Company (the "Common Shares") have been listed for trading on the TSX Venture Exchange under the symbol "GG" since September 6, 2011.

MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

OUTLOOK

Certain information set out in this section is forward looking information and is based on a number of risks and assumptions, including those related to gold price volatility, delays in production, regulatory risk, currency fluctuations, integrating successfully new acquired assets and risks and uncertainties inherent with all mining operations. For more details please see above under "Forward-Looking Statements" and below under "Risks and Uncertainties".

Mupane Property

The Company continues to carry out its improvement and exploration plan in Botswana, with a focus on the optimisation of the mining operations and the expansion of the resource base.

The Company completed a new five year mine plan for the Mupane Property in 2016 which currently forms the guide for the Company's short term goals and long term strategy. The Company intends to utilize the following resources during 2017:

- Tau Underground – It is estimated that the Company will process approximately 400,000 tonnes at an average grade of 2.6 grams per tonne ("g/t"). While developing underground the Company intends to continue exploration to attempt to confirm the extension of the Tau mineralised body at depth as reported in the press release of October 24, 2016 on the discovery of the potential extension.
- Low Grade Stockpiles – the Company will process approximately 380,000 tonnes of low grade stockpile at an average grade of 0.78 g/t, which is located at the run-of-mine pad at the processing plant and at Golden Eagle.
- Tekwane – the Company will continue to selectively mine the high grade areas and will use a screening plant at the mine site to reduce the tonnage and increase the potential grade to be delivered to the plant. The Company is planning to process approximately 30,000 tonnes at an average grade of 1.2 g/t.

The Mupane Property mine plan is subject to change according to the prevailing gold price. The Company will adopt the appropriate plan for the prevailing gold price environment.

The Mupane Property processing plant continues to focus on on-going stabilisation and optimisation of the processing operations. There are no major plant capital projects scheduled at the Mupane Property for 2017 as the Company believes it has implemented all material optimisation projects.

Galaxy Property

The Company announced in January 2017 that, at the current stage, the Galaxy Property does not generate positive cash flows and further capital expenditures are required to complete the full commissioning. Mupane continues to generate positive operating cash flows; however, at the current gold price it is insufficient to fully fund commissioning at the Galaxy Property. With the decline in gold price in November 2016 and the continued uncertainty of the price of gold, management of the Company has decided to be prudent and delay full commissioning at the Galaxy Property until the Company has sufficient funds available.

The Company will continue to review this decision and work has already commenced on an expansion plan to take annual production up to 60,000 ounces of gold. It is currently envisaged that the Company will commence a desktop study first, the results of which will then be used to support a pre-feasibility study to be completed within two years.

MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

DISCUSSION OF OPERATIONS

For the three months ended March 31, 2017

The following is an analysis of the Company's operating results for the three months ended March 31, 2017 ("Q1 2017"). For mining operations, processing and financial information, comparisons with the three months ended March 31, 2016 ("Q1 2016") have been provided.

Operating activity:

Commentary regarding the Company's operating activity during Q1 2017 follows:

Mining

The following table sets forth certain key mining statistics for the Mupane Property:

		2017		2016				2016
		Q1	YTD 2017	Q4	Q3	Q2	Q1	
Mupane (Tau)	Ore (t)	61,373	61,373	62,208	48,070	46,656	49,657	206,591
	Grade (g/t)	2.83	2.83	3.12	2.68	3.46	2.96	3.05
	Waste (t)	9,326	9,326	8,943	15,543	13,645	7,261	45,392
Tekwane and Shashe Pencils	Ore (t)	-	-	6,963	3,465	37,697	4,103	52,228
	Grade (g/t)	-	-	0.48	0.48	0.48	0.44	0.48
	Waste (t)	-	-	-	-	33,695	8,916	42,611
Low Grade Stockpiles	Ore (t)	89,371	89,371	166,886	177,207	187,275	120,469	651,837
	Grade (g/t)	0.82	0.82	0.80	0.80	0.79	0.77	0.79

The Company intended to operate two mining operations at the Mupane Property during Q1 2017:

- Tau – In Q1 2017, the Company continued mining in the main reef of the ore body with 61,373 tonnes at 2.83 g/t being mined (Q1 2016 – 49,657 tonnes at 2.96 g/t). In Q1 2016, the ore mined was the result of reef development as the Company carried out development work for the stopes. In Q1 2017, the Company mined from the main ore body and mined from the stopes resulting in increased tonnage, however the mined tonnes were below expectation due to flooding of the stopes caused by the unseasonably high rain fall experienced during the quarter.
- Tekwane – In Q1 2017, the Company was unable to mine at Tekwane due to wet weather which was ongoing throughout the quarter. In Q1 2016, the Company mined 4,103 tonnes of ore at 0.44 g/t.

In addition, the Company is currently processing ore from its previously mined low grade stockpiles, which are located next to the processing plant. In Q1 2017, it processed 89,371 tonnes at an average grade of 0.82 g/t (Q1 2016 – 120,469 tonnes at 0.77 g/t). The decrease in tonnes processed was due to increased availability of high grade tonnes from Tau underground during Q1 2017.

GALANE GOLD LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

Processing

The following table sets forth certain key processing statistics at the Mupane Property:

	Q1 2017	YTD 2017	Q4 2016	Q3 2016	Q2 2016	Q1 2016	2016
Ore milled (000 t)	159	159	248	237	250	172	908
Head grade (g/t)	1.36	1.36	1.27	1.18	1.33	1.40	1.29
Recovery (%)	61.6%	15.4%	67.4%	69.5%	73.5%	74.9%	71.3%
Gold production (oz.)	4,298	4,298	6,857	6,243	7,855	5,828	26,783

Gold production in Q1 2017 was 4,298 ounces compared to 5,828 ounces in Q1 2016. The grade and recovery in Q1 2017 of 1.36 g/t and 61.6% was lower than the grade and recovery in Q1 2016. The following is a summary of the key issues impacting gold production during Q1 2017:

- The mine site experienced unseasonably high rainfall during Q1 2017, impacting both the volume of ore available from mining and the ore available for blending the plant feed. This impacted the volume of ore available from the Tau underground, the oxide ore available from mining at Tekwane, and the reclamation from low grade stockpiles at Signal Hill.
- Consequently, plant feed was supplemented with material from low grade stockpiles located at the processing plant, however with the ore being constantly wet this had a negative impact on both feed rate and recoveries during the quarter.
- The plant recoveries for Q1 2017 were 61.6% (Q1 2016 – 74.9%). The current quarter recoveries were lower due to a lightning strike that caused power issues for both the mill and SCADA, combined with intermittent issues with the elution column heating system, which issues have since been resolved.

Galaxy Property Rehabilitation

In Q3 2016, the Company commenced the rehabilitation of the Galaxy Property. The aim was to recommence production in the last quarter of 2016, but due to a reduction in gold price the Company put the project into idle mode. Before doing so the following was completed:

- Plant refurbishment – the plant is a standard crush, mill, float with a capacity of 15,000 tonnes per month. Refurbishment was completed on the crusher, conveyors, ball mill and the float section.
- Tailings retreatment facility – the Company partially completed the build of a carbon-in-leach (“CIL”) plant within the footprint of the existing plant to process 25,000 tonnes per month of tailings material. The Company completed the construction of four CIL leach tanks, a CIL feeding section, carbon recovery plant and the associated civils. The plant can currently process 18,000 tonnes a month and requires a further two months to complete up to the planned capacity.
- Underground – the Company completed minor refurbishment to the tramming infrastructure, hoppers and the electrical cabling. In addition, development was carried out on the Giles and Woodbine ore bodies to create access to the stopes for future mining.

GALANE GOLD LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

Revenue and earnings from mining operations

The table below outlines the revenue and earnings from mining operations on a total dollar basis, and on a per ounce of gold sold basis:

	Q1 2017	Q4 2016	Q3 2016	Q2 2016	Q1 2016
Revenue (000)	\$ 6,728	\$ 7,576	\$ 8,399	\$ 9,339	\$ 7,350
Gold sold (oz.)	5,531	6,293	6,326	7,378	6,191
Earnings (Loss) from mining operations (000)	\$ (2,533)	\$ (1,721)	\$ 8	\$ 1,221	\$ (814)
Operating cash cost excluding royalties (\$/oz.) ⁽¹⁾	\$ 1,448	\$ 918	\$ 1,055	\$ 849	\$ 1,079

Note:

(1) Earnings from mining operations per ounce and operating cash cost excluding royalties per ounce are non-GAAP measures. See "Supplemental Information to Management's Discussion and Analysis".

During Q1 2017, the Company generated \$6.7 million in revenue from the sale of 5,531 ounces of gold plus incidental silver at an average combined price of \$1,214 per ounce and loss from mining operations of \$2.5 million. This compares to \$7.4 million in revenue from the sale of 6,191 ounces of gold plus incidental silver at an average combined price of \$1,187 per ounce and loss from mining operations of \$0.8 million in Q1 2016.

The reason for the change in earnings from mining operations from Q1 2017 to Q1 2016 is a result of several factors:

- Gold sales for Q1 2017 were 660 ounces less than in Q1 2016. This was partially offset with an increase in the average gold price achieved between the two quarters of \$27 per ounce. As a result, revenue was \$0.6 million lower in Q1 2017 than in Q1 2016.
- Mining costs in Q1 2017 were \$2.8 million compared to \$2.3 million in Q1 2016. The increase in cost is due mainly to the additional tonnes mined from Tau underground.
- Processing costs were \$4.3 million for Q1 2017, compared to \$4.1 million for Q1 2016. The actual tonnes milled decreased from 172,394 tonnes in Q1 2016 to 159,458 tonnes in Q1 2017, but this did not reflect in the costs. This was due to using ore sources with higher consumable consumption costs, and the feed rate being impacted by the unseasonably high rainfall during the quarter.
- General and administration costs in Q1 2017 were \$0.9 million, consistent with the costs for Q1 2016.
- Depreciation and amortization of \$1.3 million were recognized in Q1 2017 compared to \$0.9 million in Q1 2016. The increase was due to the additional tonnes mined from the Tau underground.

As a result of the above factors the operating cash cost per ounce (excluding royalties) in Q1 2017 was \$1,448 compared to \$1,079 per ounce in Q1 2016.

GALANE GOLD LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

Earnings

The Company's loss comprised of:

	Q1 2017	Q1 2016
Loss from mining operations	\$ (2,533,284)	\$ (814,893)
Exploration costs	(34,783)	(7,371)
Corporate general and administrative costs excluding share based compensation	(424,420)	(466,733)
Share-based compensation	(62,213)	(47,455)
Foreign exchange loss	(413,853)	(469,664)
Interest on long term debt	(257,985)	(63,465)
Galaxy on-going costs	(306,950)	(453,926)
Other income	1,478	1,536
Other financing costs	(231,341)	(57,523)
	\$ (4,263,351)	\$(2,379,494)

Galaxy on-going costs for Q1 2017 represent the net cost incurred to idle the plant while progress on the project has been slowed. For Q1 2016 ongoing costs represented the costs incurred to maintain the operations in care and maintenance.

Corporate general and administration costs excluding share-based compensation include the following:

	Q1 2017	Q1 2016
Professional Fees	\$ 85,310	\$ 217,837
Management fees to officers	213,208	132,302
Investor relations	5,256	7,712
Corporate general and administration	120,646	108,882
	\$ 424,420	\$ 466,733

GALANE GOLD LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

SUMMARY OF FINANCIAL POSITION

Selected Consolidated Statement of Financial Position Data:

	March 31, 2017 \$	December 31, 2016 \$	September 30, 2016 \$	June 30, 2016 \$
Total current assets	7,473,036	9,119,240	11,272,386	11,763,455
Total current liabilities	20,600,653	17,661,577	14,835,386	11,369,119
Working capital	(13,127,617)	(8,542,337)	(3,563,000)	394,336
Mining assets	38,830,793	39,508,176	36,869,795	35,540,116
Non-current liabilities	13,882,341	14,944,366	14,340,632	15,481,289
Total shareholders' equity	11,820,835	16,021,973	18,966,163	20,453,163

	March 31, 2016 \$	December 31, 2015 \$	September 30, 2015 \$	June 30, 2015 \$
Total current assets	10,755,471	11,476,338	12,595,640	15,336,093
Total current liabilities	11,560,394	14,248,390	9,737,844	13,072,175
Working capital	(804,923)	(2,772,052)	2,857,796	2,263,918
Mining assets	36,116,425	36,804,499	28,224,050	27,224,835
Non-current liabilities	15,576,737	11,965,643	7,921,121	5,738,207
Total shareholders' equity	19,734,765	22,066,804	23,160,725	23,750,546

In Q1 2017, working capital deficiency increased by \$4.6 million from Q4 2016. This was mainly due to the following movements in total current liabilities and cash balance:

- An increase in the cash balance of \$0.4 million as a result of; cash flow from operating activities of \$0.8 million; net financing inflow of \$0.2 million, with an inflow of \$0.5 million being proceeds of a short term promissory note, offset by \$0.3 million for repayment of loan facilities; and capital costs of \$0.6 million, with Galaxy project costs of \$0.4 million and Tau underground development costs of \$0.2 million.
- A decrease in ore stockpiles of \$0.6 million as the Company processed the low grade stockpiles.
- A decrease in gold in process stocks of \$0.8 million reflecting the low ore feed during Q1 2017.
- A decrease of \$0.7 million in stores inventory as a result of items consumed for maintenance during Q1 2017.
- An increase in trade payables and accrued liabilities of \$0.7 million due to timing of payments at quarter end.
- An increase of \$1.8 million in current liabilities in relation to the deferred royalties moving from non-current to current liabilities.

In Q1 2017, non-current liabilities decreased by \$1.1 million with a movement of deferred royalties to current liabilities being offset by foreign exchange movements on rehabilitation obligations, and an overall increase in the deferred royalties balance. Total shareholders' equity in Q1 2017 decreased by \$4.2 million as a result of the net loss for the quarter of \$4.3 million.

GALANE GOLD LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

LIQUIDITY AND CAPITAL RESOURCES

The Company defines capital as consisting of shareholders' equity, being comprised of issued capital stock, contributed surplus and deficit and long term debt. The Company's objectives when managing capital are primarily to support the creation of shareholder value, but also to ensure that the Company is able to meet its financial obligations as they become due. The Company has not declared or paid any dividends on its Common Shares.

In order to fund the business activities intended in its current business plan, management expects that the Company's mining operations will continue to provide positive cash flow from its operations that is more than sufficient to support its corporate expenses, capital expenditure requirements and exploration activities. As described above under "Summary of Financial Position", at March 31, 2017, the Company had a working capital deficiency of \$13.1 million and generated \$0.8 million in cash flow from operations for the quarter ended March 31, 2017.

The revenue of the Company is dependent upon the price of gold. At the current level of operating costs, the Company will continue to generate positive cash flow on an annual basis from operations even if there was a 10% reduction in the price of gold as at the date of this MD&A.

The Company's officers and senior management take full responsibility for managing the Company's capital and do so through monthly meetings and regular review of financial information. The Company's Board of Directors is responsible for overseeing this process.

Going Concern

This interim financial report was prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business as they come due into the foreseeable future.

For the three months ended March 31, 2017, the Company incurred a net loss of \$4.3 million, with operating activities generating a \$0.8 million cash inflow. However, as at March 31, 2017, the Company had a working capital deficiency of \$13.1 million (December 31, 2016 - \$8.5 million). At March 31, 2017, the Company had unrestricted cash of \$1.2 million and current assets of \$7.5 million.

The Company's liquidity position was adversely impacted by the decline in gold price in late 2016, in conjunction with free cash flow being diverted to capital projects, primarily the Galaxy re-start, which given the current cash constraints has been placed into idle mode. The Company is due to repay the remaining balance of the Samsung financing facility of \$1.7 million and commence the repayment of deferred royalties amounting to \$3.2 million during the year ended December 31, 2017.

The Company's ability to continue as a going concern is dependent upon its ability to generate cash flow from operations, renegotiate existing payment terms and, to the extent that this is not sufficient, to obtain additional funding from loans, equity financings or through other arrangements. While the Company has been successful in arranging financing in the past, the success of such initiatives cannot be assured. These conditions may cast significant doubt on the validity of the going concern assumption.

The interim financial report does not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary were the going concern assumption deemed to be inappropriate. These adjustments could be material.

GALANE GOLD LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

ACQUISITIONS

Galaxy Acquisition:

On November 20, 2015 and December 23, 2015, the Company closed the acquisition of a majority of the issued and outstanding ordinary shares (each, a "Galaxy Share") of Galaxy Gold Mining Limited ("Galaxy"), a gold mining company with operations in the Mpumalanga Province of South Africa. A wholly-owned subsidiary of the Company acquired approximately 74% of the issued and outstanding Galaxy Shares in exchange for 18,334,492 common shares with an aggregate value of approximately Cdn.\$1.1 million, based on a market price of Cdn.\$0.07 per common share, and common share purchase warrants exercisable to acquire an aggregate of up to 4,076,598 common shares until November 20, 2017 at Cdn.\$0.102 per common share (Cdn.\$0.175 before being adjusted as a result of the Rights Offering, as defined below). The Company had advanced \$149,853 to Galaxy before the acquisition to fund working capital upon acquisition this amount has been treated as part of the acquisition cost.

The final allocation of the purchase price to assets and liabilities acquired is provided below.

Mining properties	\$	12,526,313
Inventory		59,504
Other current assets		250,300
Cash		2,329
Trade and other payables		(3,309,382)
Interest bearing loans		(6,330,133)
Restoration and rehabilitation provision		(1,539,922)
Net assets	\$	1,659,009
<hr/>		
Consideration:		
Cash consideration	\$	149,853
Share and warrant consideration		
• 18,334,492 common shares		964,465
• 4,076,598 warrants to purchase common shares		113,349
Non-controlling interest ⁽¹⁾		431,342
Acquisition of subsidiary	\$	1,659,009

⁽¹⁾ The Non-controlling interest has been measured at fair value at the date of the acquisition.

The Company then made an offer to all other shareholders of Galaxy to acquire the remaining Galaxy Shares on economically equivalent terms (the "Mandatory Offer"). On November 16, 2016, the Company completed the compulsory acquisition of the remaining holders of Galaxy Shares by the payment of approximately Cdn.\$235,000 cash to holders of Galaxy Shares who elected to receive cash consideration under the Mandatory Offer and the issuance of 2,340,094 common shares and common share purchase warrants exercisable to acquire an aggregate of up to 520,016 common shares until November 16, 2018 at Cdn.\$0.175 per common share to holders of Galaxy Shares who elected to subscribe for securities of the Company in lieu of cash consideration under the Mandatory Offer. As a result, the Company became the beneficial owner of 100% of the shares of Galaxy.

The Company incurred \$192,914 of professional costs that were directly attributable to the Galaxy Acquisition which are included within corporate general and administration on the statement of earnings (loss) and comprehensive earnings (loss) in the year ended December 31, 2015.

GALANE GOLD LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

ENVIRONMENTAL DISCUSSION

The mining activities of the Company can give rise to obligations for site restoration and rehabilitation. Restoration and rehabilitation work can include land rehabilitation and site restoration. The extent of work required and the associated costs are dependent on the requirements in the local jurisdiction and the interpretations of the requirements by relevant authorities.

Provision for the cost of the Company's restoration and rehabilitation program is recognized at the time that environmental disturbance occurs. When the extent of disturbance increases over the life of an operation, the provision is increased accordingly. Costs included in the provision encompass obligated and reasonably estimable restoration and rehabilitation activity expected to occur progressively over the life of the operation and at the time of closure in connection with disturbances at the reporting date. Routine operating costs that may impact the ultimate restoration and rehabilitation activities such as waste material handling conducted as an integral part of a mining or production process are not included in the provision. Costs arising from unforeseen circumstances, such as the contamination caused by unplanned discharges, are recognized as an expense and liability when the event gives rise to an obligation that is probable and capable of reliable estimation.

Restoration and rehabilitation provisions are measured at the expected value of future cash flows, discounted to their present value and determined according to the probability of alternative estimates of cash flows occurring for each operation. Discount rates used are the ones most appropriate for the location of the mine. Significant judgments and estimates are involved in forming expectations of future activities and the amount and timing of the associated cash flows. Those expectations are formed based on existing environmental and regulatory requirements. As at March 31, 2017, the amount reflected in the Company's restoration and rehabilitation provision is \$5.8 million (on an undiscounted basis, the total payments are estimated at \$8.2 million) which was calculated by an independent contractor.

The value of the provision is progressively increased over time as the effect of discounting unwinds, creating an expense recognized as part of finance costs. Potential changes in the laws and regulations could have an adverse risk on the actual restoration costs that the Company could incur in the future.

FINANCIAL INSTRUMENTS

The Company's financial instruments consist of cash, trade and other receivables, accounts payable and accrued liabilities, interest bearing loans and borrowing, and warrants denominated in foreign currencies. The fair value of the Company's trade and other receivables, and accounts payable and accrued liabilities approximate their carrying value. The Company's other financial instruments, specifically interest bearing loans and borrowings and warrants denominated in foreign currency are recorded at amortized cost using the effective interest rate method.

Credit risk is the risk that one party to a financial instrument will cause a loss for the other party by failing to discharge an obligation. The Company is subject to normal industry credit risks. The Company currently has no trade receivables for the purchase of the gold it produces, and other receivable balance consists of amounts outstanding on tax credits from governmental authorities, each of which are expected to be paid in the near term at face value. The Company's exposure to credit risk is minimal.

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at March 31, 2017, the Company had a cash, gold inventory and receivables balance of \$7,473,036 (December 31, 2016 - \$9,119,240) to settle current liabilities of \$20,600,653 (December 31, 2016 - \$17,661,577). All of the Company's financial liabilities have contractual maturities of less than 60 days and are subject to normal trade terms. See "Liquidity and Capital Resources" section for further commentary on the Company's liquidity risks.

GALANE GOLD LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

Interest risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in market risk.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company's operations are in Botswana, South Africa and Canada and its functional currency is U.S. dollars. The international nature of the Company's operations results in foreign exchange risk as transactions are denominated in foreign currencies, including the Botswana Pula, the South African Rand and Canadian Dollars. The operating results and the financial position of the Company are reported in U.S. dollars. The fluctuations of the operating currencies in relation to the U.S. dollar will, consequently, have an impact upon the reported results of the Company and may also affect the value of the Company's assets and liabilities. The Company monitors the volatility of foreign exchange rates and will hedge its currency risk if it determines that the need arises.

Market risk is the risk that the fair values of financial instruments or that the Company's future cash flows will fluctuate because of changes in market commodity rates. The Company's efforts are currently focused on the production of gold. As such, the Company's future cash flows and valuation of its future mineral assets will be exposed to market risk on the price fluctuations of gold as a commodity.

ISSUED AND OUTSTANDING SHARE CAPITAL

The Company's authorized capital consists of an unlimited number of Common Shares, of which 146,054,760 Common Shares are issued and outstanding as of the date of this MD&A.

The Company adopted a stock option plan (the "Option Plan"). Under the terms of the Option Plan, officers, directors, employees and consultants are eligible to receive grants of stock options to purchase Common Shares for a period of up to ten years from the date of grant, provided that the number of Common Shares reserved for issuance may not exceed 10% of the total issued and outstanding Common Shares at the date of the grant. As of the date of this MD&A, subject to the terms of the Option Plan, options to purchase 11,040,000 Common Shares are outstanding and options to purchase 3,565,476 Common Shares are available for grant.

The Company adopted a share purchase plan ("SPP") on June 12, 2012. Under the terms of the SPP, each participating officer, director, or employee that has been employed with the Company or its subsidiaries for at least six months is entitled to receive the matching number of Common Shares acquired pursuant to the SPP at no cost to such officer, director or employee. Subject to certain conditions, such deferred matching shares will be issued to the participating officers, directors or employees over a three-year period following the date of the purchase of the qualifying shares. As of the date of this MD&A, the participating officers, directors and employees of the Company are entitled to be issued, subject to the terms of the SPP, no additional deferred matching shares.

The Company adopted a deferred share unit plan (the "DSU Plan") on June 3, 2014. Subject to adjustment in certain circumstances, the maximum aggregate number of Common Shares that may be reserved for issuance pursuant to the DSU Plan is 13,262,888 Common Shares. As of the date of this MD&A, subject to the terms of the DSU Plan, participating officers, directors, employees and consultants of the Company may be issued an aggregate of up to 2,873,262 Common Shares pursuant to outstanding deferred share units awarded under the DSU Plan and 965,782 Common Shares have been issued under the DSU Plan.

The Company is obligated to issue up to 7,375,000 additional Common Shares to the shareholders of Northern Lights Exploration Pty. ("NLE"), on a pro rata basis, if by July 27, 2018 certain exploration milestones are met within the NLE properties in the Tati Greenstone Belt in Botswana (the "NLE Properties").

In connection with the Galaxy Acquisition, the Company issued warrants exercisable to acquire up to 4,596,614 Common Shares.

GALANE GOLD LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

On May 9, 2016, the Company closed a rights offering (the "Rights Offering") with eligible shareholders of Common Shares of record at close of business on April 8, 2016. A total of 71,314,442 Common Shares were issued pursuant to the Rights Offering at an issuance price of Cdn.\$0.01 per share for aggregate gross proceeds of approximately Cdn.\$713,000.

DEBENTURES

The Company issued approximately \$2.4 million aggregate principal amount of unsecured convertible debentures (the "Galaxy Debentures") to settle outstanding debt or contractual obligations owed by Galaxy and its subsidiary Galaxy Gold Reefs (Pty) Ltd. The Galaxy Debentures mature on November 20, 2019 and bear 4% interest per annum, accrued and paid at maturity. The principal is convertible at the option of the holder into Common Shares at a price of Cdn.\$0.58⁽¹⁾ per share, based on a pre-determined exchange rate of \$1.00: Cdn.\$1.30. The interest is convertible into Common Shares, based on a pre-determined exchange rate of \$1.00: Cdn.\$1.30, at a price per share equivalent to the greater of Cdn.\$1.00 and the Discounted Market Price (as defined by the TSX Venture Exchange) at the time of conversion, subject to acceptance of the TSX Venture Exchange.

In addition, on March 29, 2016, the Company announced that it and its subsidiary, Galaxy, entered into a full and final settlement agreement with Traxys Europe SA, Mine2Market S. à r.l. and certain others (collectively the "Traxys parties") with respect to various outstanding claims arising from the time period when the Traxys parties operated Galaxy's mining operations. In connection with the settlement, the Traxys parties settled their claim for \$4.3 million of indebtedness in exchange for the issuance by the Company of approximately \$3.2 million aggregate principal amount of unsecured convertible debentures (the "Traxys Debentures"). The Traxys Debentures mature on November 20, 2019 and bear interest at 4% per annum, accrued and paid at maturity. The principal is convertible at the option of the holder into Common Shares at a price of Cdn.\$0.58⁽²⁾ per share, based on a pre-determined exchange rate of \$1.00:Cdn.\$1.35. The interest is convertible into Common Shares, based on a pre-determined exchange rate of \$1.00:Cdn.\$1.35, at a price equivalent to the greater of Cdn.\$0.58⁽²⁾ and the Discounted Market Price (as defined by the TSX Venture Exchange) at the time of conversion, subject to acceptance of the TSX Venture Exchange.

⁽¹⁾ The initial conversion price of both the Galaxy Debentures was Cdn.\$1.00 per share. As a result of the completion of the Rights Offering, the conversion price in each case was adjusted downward to Cdn.\$0.58 per share.

⁽²⁾ The initial conversion price of both the Traxys Debentures was Cdn.\$1.00 per share. As a result of the completion of the Rights Offering, the conversion price in each case was adjusted downward to Cdn.\$0.58 per share.

TRANSACTIONS WITH RELATED PARTIES

During the three months ended March 31, 2017, no related party transactions occurred:

CHANGES IN ACCOUNTING STANDARDS

The following accounting standards are to be adopted in the future:

(a) IFRS 9 – Financial instruments

The IASB has issued IFRS 9, Financial Instruments, which is a four-part project proposing to replace IAS 39, Financial Instruments: Recognition and Measurement. IFRS 9 is effective for annual periods beginning or after January 1, 2018. The Company will evaluate the impact of the change to its financial statements based on the characteristics on its financial instruments at the time of adoption.

GALANE GOLD LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

(b) IFRS 15 – Revenue from Contracts with Customers

In May 2015, the IASB issued IFRS 15, Revenue from Contracts with Customers (IFRS 15). The standard replaces IAS 11 “Construction Contracts”, IAS 18 “Revenue”, IFRIC 13 “Customer Loyalty Programmes”, IFRIC 15 “Agreements for the Construction of Real Estate”, IFRIC 18 “Transfer of Assets From Customers” and SIC 31 “Revenue – Barter Transactions Involving Advertising Services”. IFRS 15 is effective for periods beginning on or after January 1, 2018, and is to be applied retrospectively. IFRS 15 clarifies the principles for recognizing revenue from contracts with customers. The Company is in the process of evaluating the requirements of the new standard.

(c) IFRS 16 – Leases

In January 2016, the IASB issued IFRS 16 “Leases” (“IFRS 16”). This standard is effective for annual periods beginning on or after January 1, 2019, and permits early adoption, provided IFRS 15, has been applied, or is applied at the same date as IFRS 16. IFRS 16 requires lessees to recognize assets and liabilities for most leases. The Company is in the process of determining the impact of IFRS 16 on its consolidated financial statements.

(d) Amendment to IFRS 2 – Classification and measurement of share based payment transactions

On June 20, 2016, the IASB issued amendments to IFRS 2 Share-based Payment, clarifying how to account for certain types of share-based payment transactions. The amendments apply for annual periods beginning on or after January 1, 2018.

The Company intends to adopt the amendments to IFRS 2 in its financial statements for the annual period beginning on January 1, 2018. The extent of the impact of adoption of the standard has not yet been determined.

COMMITMENTS

As at the date of this MD&A, the Company had the following commitments:

(a) Royalty expenses

Production from the Mupane operation is subject to Government royalties (included in mining costs) of 5% of revenues based on market prices at the date of shipment. For the three month period ended March 31, 2017, the Company expensed \$340,793 in royalties (2016 - \$375,352).

(b) Operating contractual obligations

The Company has operating lease obligations which relate to obligations for land operating lease agreements as follows:

- | | |
|---|-------------|
| • To be incurred in the remainder of 2017 | \$257,433 |
| • To be incurred 2018-2021 | \$1,308,641 |

(c) Claims

The Company is also subject to the possibility of revised tax assessments for some years. The Company does not believe that, should unfavourable decisions arise from any review of its tax filings, that any amount it might be required to pay will be material. No such amounts have been provided for in the interim financial report.

GALANE GOLD LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

OFF-BALANCE SHEET ARRANGEMENTS

The Company currently has no off-balance sheet arrangements.

SUBSEQUENT EVENTS

Vantage Letter of Intent

On May 23, 2017, the Company announced that it entered into a letter of intent for the acquisition of all of the outstanding shares of Vantage Goldfields Limited, a gold mining company with operations in the Mpumalanga Province of South Africa.

Options and DSUs

On May 25, 2017, the Company authorized the grant of options to the Chief Financial Officer of the Company. Options to purchase up to 500,000 common shares were authorized for grant with a five year term and an exercise price equal to the closing price of the common shares on the TSX Venture Exchange on May 26, 2017. Such options shall vest according to the following schedule: 10% vest on the award date; 10% vest on the first anniversary of the award date; 15% vest on the second anniversary of the award date; and 32.5% vest on each of the fourth and fifth anniversary of the award date.

On May 25, 2017, the Company authorized the grant of DSUs to the Chief Executive Officer of the Company equal to 25% of his salary (approximately £62,500) and to the Chief Operating Officer of the Company equal to 25% of his salary (approximately \$68,000), each determined based on the closing price of the common shares on the TSX Venture Exchange on May 26, 2017. Such DSUs shall vest in three equal instalments on the first, second and third anniversaries of the award date. The DSUs have been awarded based on the achievement of certain key performance indicators for the 2016 financial year as previously approved by the Compensation Committee of the Company in May 2016.

SUPPLEMENTAL INFORMATION TO MANAGEMENT'S DISCUSSION AND ANALYSIS

CASH COSTS

The Company's MD&A often refers to operating cash cost per ounce, and operating cash cost excluding royalties per ounce, all non-GAAP performance measures, in order to provide investors with information about measures used by management to monitor performance. Management of the Company uses this information to assess how well the producing gold mines are performing compared to plan and prior periods, and also to assess the overall effectiveness and efficiency of gold mining operations. Cash cost figures are calculated in accordance with a standard developed by the Gold Institute, which was a worldwide association of suppliers of gold and gold products and included leading North American gold producers. The Gold Institute ceased operations in 2002, but the standard is still an accepted standard of reporting cash costs of gold production in North America. Adoption of the standard is voluntary, and the cost measures presented herein may not be comparable to other similarly titled measures of other companies. Cash cost includes mine site operating costs such as mining, processing, administration, and attributable realized derivative gain or loss, but are exclusive of impairment, amortization, reclamation, and exploration and development costs. Cash cost excluding royalties is cash cost less royalties. Operating cash cost is the total cash cost less those costs capitalized as attributable to the removal of excess waste in developing new resources. Operating cash cost excluding royalties is operating cash cost less royalties. These costs are then divided by the Company's ounces of gold produced to arrive at the cash cost measures on a per ounce basis. These measures, along with sales, are considered to be key indicators of a company's ability to generate operating earnings and cash flow from its mining operations. These measures of cash costs do not have any standardized meaning prescribed by IFRS and differ from measures determined in accordance with IFRS. They are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. These measures are not

GALANE GOLD LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended March 31, 2017

necessarily indicative of net earnings or cash flow from operations as determined under IFRS.

The following table provides a reconciliation of cash cost measures for the mine to the mining costs excluding impairment, depreciation and amortization reflected in the Financial Statements.

	Q1 2017	Q4 2016	Q3 2016	Q2 2016
